Note: The statistics has been compiled based on the actual transactions data for the review month generated as on the 1st of the following month.

1. E-DISTRICT PERFORMANCE – REVENUE CERTIFICATES

e-District performance parameters including **Reach, Quantity and Quality** of transactions recorded during the month in e-District across various project locations within districts have been presented in this section so as to aid stakeholders in the analysis of the overall State performance, while comparing the data recorded in various districts.

1.1. e-District Ranking Matrix

The e-District ranking matrix provides the overall ranking of the districts for the month based on three performance parameters, viz. **Reach, Quantity & Quality**. Reach is the primary measure on which the districts are ranked, while quantity and quality of transactions are factors dependent on the same. Generally, any district which achieves high Reach in terms of service penetration through e-District consistently with more than 80% service level achievement is considered to be performing well, and 90% or more service level achievement June be considered as excellent performance.

Based on the ranking for each of these parameters, the districts are classified into three broad categories, the best performing districts, the average performing districts, and those that need improvement. The best performing districts marked in Green are expected to strive to maintain their position, whereas the average performing ones marked in Orange as well as the lagging districts marked in Red are expected to take appropriate measures to move up to the ‘top four’ league. The ranking matrix for the month of **June ‘15** is provided below:

Rank	District	Reach	Quantity	Quality
1	KSD	1	7	8
2	KNR	2	1	3
3	PKD	3	2	9

1.1.1. e-District Performance – Service Reach

Service Reach based on applications approved in the State

The district-wise breakup of the no. of people served in terms of applications approved; per thousand of the district population for the month is examined here.

For e.g. If there are 1 lakh people in a district and if the no. of applications approved for the month is 2000, then the no. of people served per thousand shall be $(2000/1\text{lakh}) * 1000 = 20$. Higher the no. of people served, better the performance.
